Dejene Kasa Alemu

Full Stack Software Developer
Addis Ababa

Summary

I have been working on Senior Software Developer as Coordinator and tremendous where I have developed a firm and rich familiarity relating to develop system and managing for the past 4 years plus being accompanied with many appreciations for brilliance in my work and duty. I have been also done as App developer. I am a fast and accurate writer, with a keen eye for detail and I should be very grateful for the opportunity to progress for the responsibilities. I am able to take on the responsibility of this position immediately, and have the enthusiasm and determination to ensure that I make a success of it.

I have Training on Android App development, advanced Java Programming, Oracle 11g & 12c database, MYSQL, MSSQL, Mango Db, Devops, Node.js, Php, angular, C#, Grails, Project Management, GitLab (cloud project management), Network Administration, project management system tools and others. I have taken a lot of training related to Computing Systems. Also, I have developed many software. I would like to bring my specialized experience and practical talent to your Organization and thus to serve it to the best of my knowledge and potential with the spirit of staunchness and stewardship in adhering and remaining to the rules and regulations, vision and mission set by the Organization. As I saw the job responsibilities/description you have listed on the vacancy, really it is what I enjoy with and even I can excel it because it has been my usual and day to day duty/work for the last solid 4 years. Above all, for sure I am a keen frankness and I know the power and benefits of team working though I am self-initiative too.
